

Nuncius Cœlestis :
OR, THE
STARRY MESSENGER

For the Year of our Redemption 1683.
And from the Creation, according to Sacred
Writ 5632.

Being the Third from the Bissextile or Leap-year.

Wherein is contained (1) *Astronomical* and *Meteorological Observations*. (2) *Astrological Predictions* of the State of the Year, deduced according to ART, from the Solar Ingresses, Eclipses, various Configurations, Aspects and Conjunctions of the Planets. (3) The *Rising and Setting* of the Sun and Moon: Also Her *Southling*; Together with many useful Rules and Tables pertinent for such a Work, Accommodated to the Meridian of London, which lies in the Latitude of 51 deg. 32 min. North, but may indifferently serve (without sensible Error) for any other part of Great Britain. And to compleat the work; here is presented (as formerly) *Monthly Observations*, also an *Ephemeris* of the *Diurnal Motions* and *Aspects* of the Planets together with a *Table of Houses* for the Latitude of London, by which a *Figure of Heaven* may be set for any time past, present, or to come. The like in all particulars not extant in any other.

By HENRY COLEY, Student in the *Mathematicks* and the *Cœlestial Science*.

The Twelfth Impression.

Legere perlegere & tunc Judicare.

I will behold the Heavens, even the Works of thy Fingers, the Moon and the Stars which thou hast ordained, Psal. 8. 3.

LONDON,

Printed by A. G. for the Company of Stationers, 1683.

I Do here present you with my Judgments, of, (as well as Observations on) the Year 1683. which has been (not a little) discoursed of by many inquisitive persons some years past, who expect great things should happen therein; and the more probable in regard of the late Prodigious Comet which preceded; seconded with a Triple Conjunction of the Superiour Planets H and V in the sign Q near unto a violent fixed Star of the first Magnitude called the Lyons heart. I conclude some things very remarkable, and no less significant, may break out in Europe this very year, but much more in some few succeeding years may also (I presume) be certainly expected; since our own Experience can testifie, that Comets and such famous Conjunctions have had (at sometimes) very prodigious effects in many parts of the World, or (at least) strange Casualties have followed; witness the devouring Plague, and dreadful Fire that afflicted and Demolished the City of London in the years 1665, and 1666. which will never be forgotten whilst the World continues: this followed shortly after the Conjunction of H and V in T the Opposite Sign of our Metropolitan Cities Horoscope, it was celebrated in October 1663 and attended by a Comet or Comets in December 1664, which was seen all over England, and many places of Europe. Many Examples might be Collected from History and Chronology, of very strange and notable effects which have followed such Cœlestial Congresses and Phœnomena, whence I conclude they are so many Monitors, or rather Harbingers sent by the Almighty to forewarn us of his Judgments Impending and approaching, which too frequently we draw upon our selves. And here I conclude I may rationally affirm, that such Calamities are naturally the effects of such Causes—*Fiat Dei voluntas*—Molineus fol. 160. says, *non est Negandum, & Cœlestia vel æria ostentu sæpe fuisse prænuntia calamitatum*, we may not deny (says he) that the Heavenly or Areal Prodigious, are oftentimes the Messengers or Ambassadors of Misery and Calamity unto mankind; and who knows not that Misery and Death it self can find us out when we least think of it; and the Sword of Justice can destroy the Sinner any where, at any time, beyond all expectation.——But I shall say no more (in this place) but rather refer the Reader to the perusal of the following Discourse, and what he may find in *Mr. Lillies Anglicas 1683.* intended to be continued if God permit, By the Author hereof,

H. COLEY.

Westminster-Hall both Good and Bad both yield,

They'r not all Rooks that in the Temple build;

For many Lawyers doubtless found may be,

That scorn a Bribe, or an unlawful Fee.

Cease Railing then my Friend, I prethee cease,

Learn to speak well, or ever hold thy peace.

Charles	1630	1648 Jan. 30.				Whom God grant long to Reign

*Now Peace and Plenty in Great Britain Reigns,
And none but Enemies that still complains;
I ask our Anti-Monarchists, How they
Could more oblige us, if they had the sway?
For let them fancy what they please, new things,
No Freedom's like to that proceeds from Kings.*

*Now let all Loyal hearts with us conclude,
May Cæsar live and never be subdued.*

Vivat, Vigeat, Vincat.

This Table is so plain and easie, that it needs no Explanation more than the Titles direct. Note, That Easter ever falleth between the 21 of March and 26 of April exclusively, and if the Golden Number be either 5, 13, or 16. and the Dominical Letter G, then Easter-Day falls on our Lady-Day, or the 25 of March. Likewise when the Golden Number is 8, and the Dominical Letter C, Easter Day falls on S. Marks day, or the 25 of April.

January hath xxxj. Days.

Full Moon the 3 day, 26. min. past 3 in the morn.
 Last quarter the 9 day, 3 min. past 8 at night.
 New Moon the 17 day, 45 min. past 2 afternoon.
 First quarter the 25 day, 34 min. past 7 at night.

February. 1683

Month days . Astrology in its purity is an honest and Lawful Art, and never was prohibited but amongst such Professors that referr'd their Predictions to Fatal Necessity: (which never was maintain'd amongst Christians;) For 'tis generally agreed on, The Stars incline but no compel.

Month days .	D	R&S.		D south		H. Wat		Astrological Predictions.	
1	7	15	5	12	27	3	M. 20	Magistratus bonus, Dei donum est.	
2	7	14	5	0	M. 27	3	36	Various are the Transactions and	
3	7	12	5	1	16	4	20	disputes of this month; For now	
4	7	11	5	2	4	5	10	the spirit of contradiction appears	
5	7	10	5	3	6	6	8	too much in the Actions of some	
6	7	8	5	3	5	7	2	persons very well known in this	
7	7	5	5	4	5	7	56	Nation. I say Blessed are the Peace	
8	7	4	5	5	3	8	44	makers. Many are perplex'd at	
9	7	1	5	6	2	8	34	home, others in as great fear and	
10	5	59	6	7	2	10	29	disorder abroad in Countrys far	
11	5	57	6	8	1	11	16	remote from us. Strange casualties	
12	5	55	6	9	1	12	7	at Sea, and thence much loss to	
13	5	53	6	9	4	12	55	the worthy Merchant. Discontented	
14	5	51	6	10	3	1	A. 44	turbulent spirits seem very	
15	5	48	6	11	2	2	29	troublesome to the Magistracy of	
16	5	46	6	12	7	3	10	this Nation, Religious designs are	
17	5	42	6	0	A. 4	3	55	still fomented, the honourable Cler-	
18	5	40	6	1	3	4	40	gy receive strange aspersions and	
19	5	38	6	2	1	5	22	reflections. Many complain much	
20	5	36	6	3	0	6	6	for want of trade, and rumors are	
21	5	34	6	3	4	5	45	dispersed as if some tumults or up-	
22	5	32	6	4	3	7	36	roars were too near approaching.	
23	5	31	6	5	2	8	28	Some persons are notwithstanding	
24	5	30	6	5	1	9	18	near promotion, and we may all	
25	5	28	6	7	1	10	18	hope well of his Majesties affairs of	
26	5	26	6	8	8	11	14	Great Brittain Italy is in some dan-	
27	5	24	6	9	1	12	19	ger, and variety of News dayly ar-	
28	5	21	6	10	1	1	M. 17	rives to England from Foreign	

Note that the Roman Account is always 10 days before the English Account, so that their 11th day is our first, &c. Contentiones Fugiende.

March. 1683.

And hence *Astrology* being a natural *Art* is Lawfull to be practiz'd by all Laws whatsoever, and according to the Rules thereof grounded upon experience, may be *Predicted* a Probability of War, Sedition, Commotion, Droughts, Pestilence, Famine, &c. which for the most part follow, Comets, Eclipses, great Conjunctions, &c

Month days.	D.	R&S.	Month	H. Wat.	Astrological Predictions.
					<i>Sors omnia versat.</i>
1	0	18 6	11A.12	1 M.59	
2	6	16 6	11	57 2	20 We find such a contradiction of
3	6	14 6	12M.17	3 13	humors in some men, that they can
4	6	12 6	0	57 4	2 as it were transform themselves in-
5	6	10 6	1	50 4	56 to any form for advantage, and to
6	6	8 6	2	47 5	53 effect their own evil designs. The
7	6	6 6	3	38 6	44 3 superior <i>Planets</i> are Retr. and the
8	6	4 6	4	31 7	37 consultations of this Moneth are
9	6	2 6	5	21 8	26 not so hopeful & prevalent, nor the
10	6	0 6	6	12 9	18 Persons consulting, not so active as
11	5	58 7	7	4 10	10 formerly. Many secret conspiracies
12	5	56 7	7	52 10	58 and unworthy affronts, indeavoured
13	5	54 7	8	38 11	44 against persons of great Honour;
14	5	52 7	9	28 12A.34	34 amongst the rest, an eminent
15	5	50 7	10	8 01	14 Lady suffers in her Reputation
16	5	48 7	10	55 02	1 too publicely about the beginning
17	5	46 7	11	37 02	43 hereof, but the latter half
18	5	44 7	12	22 3	28 of the Month produces better
19	5	43 7	1 A. 7 4	12	things amongst us, which continues
20	5	41 7	1	48 4	54 not long; and about the close
21	5	39 7	2	35 5	41 of the Month some eminent
22	5	37 7	3	28 5	34 Martial man receives prejudice, or is
23	5	36 7	4	17 7	23 vigorously opposed by a person
24	5	35 7	5	13 8	18 in great power, to whom he is
25	5	34 7	6	9 9	15 forc't to submit. Perhaps a Duel of
26	5	33 7	7	5 10	11 very dangerous consequence. Yet
27	5	30 7	8	4 11	10 good News arrives to <i>England</i> ,
28	5	28 7	9	2 12	8 Let us resolve to be Loyal and
29	5	26 7	9	55 01	c Dutiful to our Prince, and we
30	5	24 7	10	53 1 M.58	shall be happy; for <i>Divisions</i> and
31	5	22 7	11	48 2	54 <i>Factions</i> are the tortures of a Crown.

April hath xxx. Days.

April. 1683.

By *Astrology*, an able Artist therein, may from the *Nativity* of any Person Predict, whether the *Native* shall be naturally inclin'd either to vertue or vice, a long life, or short, natural or violent, and in fine, the various transactions of the *Native* from the Birth to the Grave.

Month
days

D.	©R&S	D south	H. Wat.	Astrological Preditions.
1	5 20 7	12 31 3	27	<i>Non nobis nati sumus, &c.</i>
2	5 17 7	0 M. 41 3	M. 47	We all know that there is no de-
3	5 14 7	1 28 4	34	sign, let it be never so wicked but
4	5 12 7	2 24 5	30	'tis masked with a pretence of
5	5 10 7	3 17 6	23	some good. I heartily wish we
6	5 8 7	4 12 7	18	do not find it so by experience
7	5 7 7	5 4 8	10	about this time. The ☿ of the ☉
8	5 2 7	5 57 9	3	and ☿ can have no good effects,
9	5 1 7	6 44 9	50	it too frequently puts many per-
10	5 0 7	7 33 10	38	sons into strange heats and pas-
11	4 58 8	8 16 11	22	sions, whence many violent de-
12	4 56 8	9 1 12	7	bates, and unreasonable disputes
13	4 54 8	9 43 12	49	arise, the little <i>shrub</i> will contend
14	4 52 8	10 27 1	A. 33	with the lofty <i>Cedar</i> for Suprema-
15	4 50 8	11 5 2	15	cy; but let such persons be more
16	4 48 8	11 54 3	0	moderate and consider that he
17	4 46 8	2 A. 40 3	46	that rises above his heighth, may
18	4 44 8	1 30 4	36	fall below himself. The nimble
19	4 43 8	2 20 5	26	Planet ♀ salutes ♀ and ♀ with
20	4 41 8	3 12 6	18	a benevolent △ Aspect, but angry
21	4 39 8	4 12 7	18	Retrograde ☿ with an ☿, and
22	4 37 8	5 3 8	14	'twill be worth any curious per-
23	4 36 8	6 3 9	8	sons observation to consider the
24	4 35 8	7 0 10	6	effects of these configurations,
25	4 33 8	8 56 11	2	Scurvy ridiculous <i>Pamphlets</i> are
26	4 31 8	9 36 11	42	too frequently dispersed, and do
27	4 29 8	10 33 12	39	the Nation much mischief. Many
28	4 28 8	11 35 1	M. 41	cheats acted now, and as some
29	4 26 8	12 27 2	33	witty persons are promoted and
30	4 24 8	12 38 3	44	countenanced, so on the other
				side, insolent scoffers are chastised.

3	4	19	8	2	45	5	10	expel poyson by contrary poyson,
4	4	17	8	2	56	6	4	the two <i>Superiours</i> have lately been
5	4	16	8	3	45	5	55	in ☐ <i>Aspect</i> to ☉, and now they
6	4	14	8	4	40	7	46	meet the same <i>Aspect</i> of ☿, to
7	4	13	8	5	30	8	36	which may be added the ☿ of ☿
8	4	12	8	6	15	9	21	and ☿ with <i>Reception</i> . This will as-
9	4	11	8	6	58	10	4	surely prove a month of notable
10	4	10	8	7	35	10	45	Transactions. Many seem weary
11	4	9	8	8	10	11	16	with fruitless expectations, and sit
12	4	7	8	9	6	12	12	down with much discontent, others
13	4	6	8	9	50	12	56	are held up by the Chin, & there-
14	4	5	8	10	36	1	A. 42	fore must needs swim, all things in
15	4	4	8	11	23	2	29	their affairs running in a clear &
16	4	2	8	12	11	3	17	smooth current. But amidst all ge-
17	4	1	8	1	A. 9	4	15	neral affairs which are strangely
18	4	0	8	2	55	5	11	banded up and down, we have just
19	3	59	9	3	06	6	6	cause to fear a very sickly season.
20	3	58	9	2	55	7	0	The <i>superiours</i> meet again a third
21	3	57	9	4	53	8	0	time this month in ☿, and I fear
22	3	56	9	5	49	8	55	we are already too sensible of their
23	3	55	9	6	35	9	41	effects, together with the late Co-
24	3	54	9	7	24	10	30	mits which certainly was the <i>Pro-</i>
25	3	54	9	8	20	11	26	<i>dromus</i> of very dismal calamities to
26	3	53	9	9	12	12	18	ensue in many Kingdoms and
27	3	52	9	10	6	1	M. 12	Countries of <i>Europe</i> , we may justly
28	3	52	9	10	57	2	3	expect some severe Judgment im-
29	3	51	9	11	51	2	58	pending, and therefore had need
30	3	51	9	12	45	3	30	pray <i>Libera nos domine</i> . The month
31	3	50	9	0	M. 45	3	55	ends with pleasing News, &c.

June hath xxx Dayes.

J U N E 1633.

Astronomy, for Antiquity is reported the most ancient of all Sciences, and although all Ages (in some part of the World or other) have been still endeavouring to improve it; yet of all natural knowledge (such is the sublimeness thereof) this has hitherto had the slowest Improvement till this present Age.

Cross Configurations begin the Month and too many will assuredly find it so. Prosperment is a Curse to those persons that know not how to use it, and many had been happy if they had never been exalted-----More then ordinary matters either in Council or Action this Month, and new twill be very apparent where, and in what manner Providence will assign the grand Actions of this Summer. Many rich laden Ships are expected to the Merchants great satisfaction now or very near this time, and we do yet continue moderately quiet, amongst our selves, though the endeavours of many are to draw us into Confusion. The Great God of Heaven defend us from all dangers and vain fears as well as false Reports, for some disturbed Spirits and crazy brain'd Fellows will be in Action and thereby disturb our Superiors as well as themselves, I fear a very sickly Season, and thereby many persons are hurried to their long home, *Eiat dei voluntas.*

For, by the help of the *Telescope* many things in Astronomy have been discovered, which former Ages were ignorant of, and though the motion of the Earth be a doctrine almost generally received, and by some great Masters much defended, yet there are others that damn the opinions of those that aver its motion as whimsical and ridiculous.

○ R. & S. D. Sour. H. Wat.

Astrological Predictions.

Omnium Rerum vicissitudo est.

We may sometimes observe more changes in a few years, then in all probability of expectation many Ages could produce. *Italy* is menaced with many dangers, either now impending, or nearly approaching; The Religious party seem much disturbed, I mean those who are Enthusiastically Superstitious, and walk out of the Royal Road of Loyalty (as one well intimates) very notable Councils and serious Debates about this time, and yet strange rumours are spread abroad, and the people perplex themselves to purpose, with fears and jealousies of their approaching Ruine. They discount frequently and expect daily changes in the *Macrocosme*—And who is there amongst us that is able to recall what is past, command what is present, or prevent what is to come? The Heavens do not smile, or favour the endeavours and proceedings of his Holiness, for there appears some disturbance at *Rome*, which will not easily be composed: many Aged persons much afflicted, and others yield to the Grave, the Cardinals in great fear, and the Pope himself nearer his exit then he supposes—We live now in very strange times, wherein Villany is so much in fashion, that some think it absurd to be virtuous—

Month days

Eng. Accountm. D.

[illegible]

AUGUST 1683.

Month days. And although they allow the Sun to be *Centrum Vite*, and *Locus Mundi*, yet they will not have him to be the Centre of the Universe, but rather the Earth, according to the old *Hypothesis* of *Ptolomy*, nor can any Arguments or Demonstration of their *Antagonists* persuade them to the contrary.

Potentes potenter tormenta patientur.

There is so little certainty in what we enjoy that we cannot hope to bequeath an infallible substance to our posterity. This Month is attended with great variety in the configurations of the Planets which will produce as much variety in our Actions. And in my Judgment nothing but sorrow and affliction can be expected. All persons seem much concern'd and are at a stand in their proceedings. Jupiter changes his Sign and enters into his Derriment this Month, which seems to threaten the dissolving of some potent Governments. There is no confidence or assurance in any worldly thing. A *Cæsus* to day, an *Imus* to morrow. Notable endeavours in many Countries to joyn in Confederacy to carry on some high design, now in agitation, also many difficulties arise concerning the Settlement of Leagues and Alliances between some of the Princes of Europe. God preserve our own Nation and the Monarch of Great Britain, Amen.

SEPTEMBER 1683.

Month days

Again those that do teach that the *Earth* hath a *Diurnal* and *Annual Motion*; and that the *Sun* hath no other motion but that about his own *Axe*, as appears by *Telescope* Observation, yet are they at no small loss to solve some ordinary *Phænomena's*, which have been observed in and about the other *Cælestial Bodies*.

Tollere Impedimenta.

Things of wonder are not accomplished without long and serious consideration-----The actions of this month are not much different from those of the last, we are yet under the operation of the former influences; every Man for himself, and God for us all. We still live in hopes of better days, Matters are fairly carried on, and the Consultations of this Month are very high and admirable, whence arises a more perfect unity amongst our selves in general, and yet there are many sorrowful Souls afflicted with strange Diseases about this time, such as few Physicians can Cure, or render a Reason for; God preserve us from a raging Plague in *England*, or some other Pestilential Favours, &c. destructive to Mankind. By this time we shall see the greatest evil in this kind, that mortals must be content to suffer! And after a shewre of wrath comes a flood of grief usually-----Divine Providence has an unsearchable depth, the Bottom whereof the soundest judgment of Man can never sound, as sometimes working effects by contrary causes.-----

OCTOBER 1683.

For who is it amongst those curious searchers, that informs us what's the meaning of those three *Zones* that are about the Body of *Jupiter*, or how comes it to pass that *Saturn* appears in an Oval form, and, as it were, with a Triple Body? And what Use their *Satellites* are to them — (some affirm ♀ and ♂ are *Satellites* to the ☉.)

	☉ R.&S.	☽ South	H. Wat.	Astrological Predictions.
11	16 35 6	4 M 10	7 M 16	<i>Mendacii Pater Diabolus.</i>
07	26 38 6	5	28 8	
04	36 40 6	5	54 9 0	Nothing becomes Authority so well as a grave and sober moderation. This Month is attended with very propitious Aspects which may have answerable effects in the general Affairs of all <i>Europe</i> , they foreshew Agreement in Councils, and promise very noble endeavours for the promotion of the publick; and if so, why do we trouble our selves about things which possibly may happen, and peradventure not? The exact truth of things is only known to God, but it is yet lawful for us to enquire and conjecture, though not with too much confidence. Now the Merchants of our Nation may expect happy returns, and certainly pleasing News arrives from many places in <i>Europe</i> , and His Majesty of Great Britain is not only courted with Addresses and thanks from his own Subjects at home, but by Ambassadors and Emissaries from Remote Parts to the great Credit and satisfaction of our Nation in general; But when our desires are satisfied, we grow weary of our happiness.--

NOVEMBER 1683.

And as to *Comets* many tell us they are no more then a *Conglobation* of the *Effluvia* of the *Sun*, and the other *Planets*: Others say, They are a *Conglobation* of *Aether*: And a third sort affirm, That *Comets* are really *Planetary Bodies*, and are *Periodical* in their appearances, and therefore will undertake to Calculate their Motions, &c.

Astrological Predictions.

Jucunditas cordis est vite hominis

There is nothing so hard but Custom makes it easie unto us, therefore let what Variety of Changes soever happen, let not them or the thoughts thereof affrighten or discompose us. This will certainly prove a Month of much business, and now the greatest Wits of this Nation (as well as of others) are at work and appear very active; for great things are now in agitation, some are of good consequence others of evil Tendency.

It is impossible the most prudent and deliberate Endeavors of the best of Councils should gain the good opinion of the whole Kingdom; much less of all the World. Many worthy persons amongst us make their Exit this year: and near this time, others meer preferment and possess their places, for the Wheel of Fortune is continually turning. Some leave a good Report behind them and others (perhaps undeserved) are evil spoken of afterwards. By envious persons who may trample upon their Graves, but cannot hurt their Ashes.

December hath xxxi days.

Last Quarter the 1 day, 40 min. past 5 in the morn.
 New Moon the 8 day, 10 min. past 2 in the morn.
 First Quarter the 15 day, 25 min. past 9 at Night.
 Full Moon the 23 day, 2 min. past 5 in the afternoon.
 Last Quarter the 30 day, 44 min. past 1 in the afternoon.

DECEMBER 1683.

whose Period is Twelve year : They also tell us that when these Comets are in their *Perigæon* and not *Sub Radiis Solis*, that then they appear unto us, Howbeit many Ingenious persons look upon this Opinion to be but barely notional, and notwithstanding some Reasons that may be produced, 'tis but to gratifie their own pregnant and ingenious Fancies.

R. & S. D. Sour. H. Wat.

Astrological Predictions.

Amici cum Fortuna mutantur.

We are still under the forcible Operation of the Configurations of the Planets in the last Month, some Bickerings appear amongst Great Ones, strange and sudden disjuncts are foretold but soon Composed again (at least seemingly) yet Power and Majesty can brook no Equals, and we know revenge may make a Dwarf a Giant. Many Reports and strange Rumors are too frequently dissest abroad, also Multitudes of lying Phumplets whose Authors are as handsomely met withall not onely this Month, but in some of the former. Material Accidents grounded upon precedens Configurations of a malignant nature may now begin to operate for such Mutations as are of great concernment in the Microcosme appear not on a sudden, but leasurely and as fit matter and opportunity shall direct. The Year ends with hopeful News to England, and we are yet in Peace in spite of its greatest Enemies. Long Live King Charles the Second, is my most hearty Prayer, and ought to be (the same) of all his Loyal and Loving Subjects.

This Table shows the Interest of any sum of Money from 1 s. to a 100 from a day to a year. And by the help of Addition you may compute the Interest of any sum whatsoever; and note that for the greater exactness the penny is divided into a 100 parts, so that 25 parts are a farthing, and 50 parts an half-penny, and 75 parts 3 farthings, &c. *Example,*
The Interest of 100 l. for 6 months one week and one day, is thus found by the Table.

Interest of 100 l. $\left\{ \begin{array}{l} \text{for 6 mon. } 03-0-0-00 \\ \text{for 1 week } 00-2-3-61 \\ \text{for a day. } 00-0-3-94 \end{array} \right\} \text{viz } 3 \text{ } 2 \text{ } 7 \text{ } \text{half p.}$

Astrological Observations for the Year 1683.

First, I shall begin with the *Winter Quarter*, which according to *Astronomical* computation Initiates *Dec. 11. 1682.* at 50 m. past 8 in the morn. at which time the *Sun* touches the first point of the *Tropical Sign Capricorn*. Those that desire it, (and are able) may easily set the Figure if they please, and to such as understand not a *Scheme*, it will be no way serviceable, however the following *Conjectures* are impartially deduc'd from the *Genuine Rules of Art*, as I shall declare as occasion serves— At the time of this *Ingress* the *Moon* is in *Square* to the *Sun*, and applied to the *Sextile* of *Mercury* and *Conjunction* of *Mars*, but at the *Full Moon* preventional, she is seperated from the *Sextile* of *Saturn* and *Jupiter*, and hastened to a *Quadrat* of *Mars*; And at the *New Moon* Postventional, she again applies to *Mars* by the same *Aspect*. From these considerations, and others concomitant, as the present *Conjunction* of the *Superiors*, and other various *Configurations* of the *Planets* this *Winter Quarter*, I may rationally judge that it will be attended with very great *Councils* and *Consultations*, such which perhaps were not expected, and as little desired by many persons in our *Nation*; but doubtless to the great *Satisfaction* of all *Loyal Hearts*, and to the major part of our *Kingdom* in *General*. Now I may truly say with a most *Learned Person* of this *Nation*, viz. By a word we may wound a *Thousand*, and at one *Blow* assassinate the *Honour* of a *Nation*.— And it is as compleat a piece of *Madness* to miscale and rave against the *Times*, or think to recall men to reason by a fit of *Passion*. *Tempora mutantur*, &c. may very well be applied at this time; but without all doubt we may upon good *Grounds* conjecture, that the *Actions* and *Designs* now on foot, both in our own *Nation*, and divers other parts of the *World* (Depending upon the *aforesaid Influences*) will be very great and eminent, carried on, and prosecuted with much *Celerity* and no less *Prudence*, by the most *Active*, *Grave*, and *wise Senators* of the *Macrocosme*— Time will produce and manifest unto us the *particulars*; and I predict, and really wish our *Nation* may still flourish and appear, not only the *Admiration*, but formidable to all the *Princes* and *Potentates* of *Europe*, and the other parts of the *World* in *General*— The *Motion* of the *Stars* and their *Influences*, are acted by the *Command* of an *Eternal Decree*, which no *rational person* will deny. And we are now falling under the *Effects* of the most famous and remarkable *Conjunction* of the *Superior Planets* that has hap-

By HENRY COLEY.

ended many hundred years; therefore within these few years
 we may justly expect most wonderful *Transactions*, not only
 throughout all *Europe*, but many other parts of the World also,
for cum Superioribus nunquam iudicia de rebus parvis facies, &c. Ri-
ph. Aph. 39. Judge no small or trivial matters to succeed the
Conjunction of the *Superiour Planets*. And in his 32 *Aphor.* he
 has these words, *viz. Deteriorantur genera hominum per transmuta-*
iones illarum magnarum Conjunctionum, &c. The kinds and qua-
 lities of men are depraved and made worse, or corrupted by
 the *Transmutation* of those great *Conjunctions*, whenas those great
Conjunctions which succeed are inimicably configured with
 the *Preceding Positions* of Heaven, &c. These things I only
 touch upon by the way; for now the *Superiour Planets*, are be-
 come *Retrograde* since the latter end of *November*, and by that
Retrograde Motion meet the second time in *Conjunction* in
Leo, the 20th. of *January* following; but about the end of
March, or beginning of *April* next, they become *Direct* and
 meet again the third time in *Conjunction* in *Leo*, that Regal Sign,
 and near an Eminent fixed Star of the first *Magnitude, viz. the Ly-*
ons Heart, which renders its Effects the more powerful, and
 notably significant; but it cannot be expected they should im-
 mediately succeed; and therefore not only this year, but many
 future years (God willing) I may occasionally touch upon its
 Effects, as also of the late *Comets*, and perhaps take particular
 notice thereof, if some other *Student in this Art* prevent me not,
 and save me the Labour, which I should be glad to see cop-
 iously and rationally performed. A great *Conjunction* of the *Su-*
periors, is looked upon in it self as a Birth, which by time and
 order of Nature gradually comes to perfection, and performs
 the work the great God of Nature has ordained it for. Two
 remarkable things happened in *Europe* upon the entrance of *Sa-*
turn and *Jupiter* into the *Fiery Trigon*, which was in the year
 1603. The first was the union of *England* and *Scotland* into one
Monarchy, by the coming in of *K. James* (of Blessed Memory) who
 was the first Monarch of *Great Britain*. And Secondly, in the
 year 1607 the *Hollanders* were treated as a *Free State*, who be-
 fore were in Quality as *Subjects, &c.* but more hereof in the subse-
 quent Discourse, in which I do not desire to abound in my own
 Sense, or take the Liberty to be Singular or Dogmatical, but
 shall joyn *Art* and *Reason* together, and then I hope I may

Astrological Observations for the Year 1683.

hit the White— to conclude my Judgment upon this *Quarter* I find the month of *December* is attended with many propitious *Aspects* of the *Planets* amongst themselves, from whose *Benevolent Influence* we may hope well, that the *present Affairs* of the *Nation* should be carried on in most excellent Order, to the *General Satisfaction* of all His Majesties Loyal Subjects— But in the height of Joy there may be a depth of Sorrow: For the *Actions* of the month of *January* will be much more remarkable in one kind or other, much clashing, and many grand Controversies appear now amongst us, which perhaps was not thought of before, and now break out to purpose— *February* is taken up in mature Consultations about the aforesaid matters for the most part, and the *Diseases* of this *Quarter* (considering the time of the Year) especially those two last months, I fear break out too considerably; many are now afflicted in *Body* and *Mind*— and too many with Distempers of *Body* only of very dangerous Consequence, from all which let us pray *Libera nos Domine*; and thus I proceed to the Consideration—

(2.) Of the *Spring Quarter*, which this year commenceth according to the *Rudolphine Tables* (and some others) *March* the 19th. 19 min. past 8 in the morning, at which time about 2 degrees of *Aquary* will Culminate, and near 6 Degrees of *Gemin* ascends in the *Meridian* of *London*; but according to the *Carriline Tables*, at 40'. 24". past 10 in the morning, 2 h. 21 m. difference, at which time about 8 d. of *Pisces* culminates, and near 12 d. of *Cancer* ascends in our *Horizon*; and therefore since the Difference is so great to avoid all *Objections*, I shall not consider the Scheme of Heaven at the *Suns* Ingress into *Aries*, but rather the *Longitude* and *Aspects* of the *Planets* the same day, together with the *Position* of the *Heavens* at the *Lunations* preceeding and subsequent, not omitting the *Mutual Configurations* of the *Planets* during this *Quarter*, and other matters proper to ground a Judgment upon, which (notwithstanding a Scheme has hitherto been inserted in my *Annual Books*) this has ever been my Method, which I hope none can condemn as *Irrational*, but rather conclude with me, it's the most sure and certain Foundation to build a Judgment upon.—

By HENRY COLEY.

A Table of the Planets places and Aspects March 10. 1683.
at Noon in the Meridian of London.

Signs.	♈	♉	♊	♋	♌	♍	♎	♏	♐	♑	♒	♓
☉ 0-8.	♈	♉	♊	♋	♌	♍	♎	♏	♐	♑	♒	♓
☿ 2.23.	♈	♉	♊	♋	♌	♍	♎	♏	♐	♑	♒	♓
♁ 6.12.	♈	♉	♊	♋	♌	♍	♎	♏	♐	♑	♒	♓
♂ 11.50.	♈	♉	♊	♋	♌	♍	♎	♏	♐	♑	♒	♓
♀ 12.28.	♈	♉	♊	♋	♌	♍	♎	♏	♐	♑	♒	♓
R.												
♂ 14.31.	♈	♉	♊	♋	♌	♍	♎	♏	♐	♑	♒	♓
R.												
☿ 17.23.	♈	♉	♊	♋	♌	♍	♎	♏	♐	♑	♒	♓
♁ 28.19.	♈	♉	♊	♋	♌	♍	♎	♏	♐	♑	♒	♓
R.												

By this Table it appears the ☉ and Mercury are in Conjunction; but Venus is lately separated from the Opposition of Saturn and Jupiter, and the Moon separates from the Quadrat of Mercury, and hastens to the Quadrat of Mars.

In the Full Moon preventional about 11 d. of *Virgo Culminatus* and 21 deg. of *Scorpio Ascends*: The Moon defluxes from a Sextile of Mars, and applies first *ad vacuum*, then to an Opposition of Mercury, and lastly to a Sextile of Saturn and Jupiter; and in Trine of Venus, the Moon was posited in the Mid-heaven, the Superiors both Retrograde in the 9th. House, there in Opposition to Venus, Mars in the 11th. Retrograde in his Detriment, the Sun in the 4th. and Mercury near the Cusp of the 5th. and lastly Venus in the 3d. with Cauda.— In the Conjunction or New Moon Preventional 3 d. of *Sagittary Culminates*, and 2 deg. of *Aquarius Ascends*. Saturn and Jupiter are Retrograde in the 7th. in Trine to the Sun; Venus in the Ascendant in Trine to Mars in the 8th. The Luminaries in the 2d. Mercury Retrograde in his Detriment and Fall intercepted in the Ascendant. Cauda is also in the Ascendant, and the Moon defluxes from an Opposition of Venus, and applies to a Trine of Saturn and Jupiter. This being premis'd, hence I extract this Judgment. This is the Year wherein great Changes have long since been predicted, and now we shall experience what those Alterations may be: for Time is the Parent of Truth, and must consummate all things, and 'tis the Measure of all our Actions, saith the Lord Bacon. He also tells us in

Astrological Observations for the Year 1683.

his Essays, that 'tis observed in the Low Countreys (but knows not the particular place) that every 33 years the same kind and suit of Years and Weathers come about again, as great Frosts, great Wet, great Droughts, Summers with little Heat and the like, and they call it the *Prime*. He affirms also, that he has by computing backward found some Concurrence; and therefore would not have it given over; and I the rather mention it to put some ingenious Person upon the curious Enquiry, &c. But to our matter in hand, I conclude about this time we begin to have a better Understanding of some late Proceedings, and yet more new Matter is discovered, and falls under Debate for a time, and certain persons are check'd for their fraudulent Dealing, notwithstanding all their plausible Pretences of Innocency, and their quaint Arguments to excuse their Guilt, sufficiently prov'd against them: But the latter end of March produces much better News both from Places and Countries far remote abroad as well as amongst our selves at home in *England*. Now many Impugning Persons that have long laboured under strange Fears and Perplexity of Spirit, begin to see a very fair Prospect of a happy Issue to their tedious Vexations and present Troubles, whether they lie in Publick Concerns or Private Affairs. Other persons who have formerly been deprived of their Honor or Places of Trust, are now or near this time most happily restor'd: And such Corporations in many Places of this Kingdom, who have been long in doubt of hopeful Success as to their Priviledges, Charters, and Laws, are now this *Spring* (in all probability) conveniently reduced upon a fair and honourable Acknowledgment and Submission to the Supreme Power that protects them. *Quia ante non erat post dolebit*. Much Debate still about Religious Matters, and settling Affairs: Many Complaints are brought in, and taken into serious Consideration, and amongst the rest some deserving Persons are preferred to Church as well as Legal Advancements. His Majesty of Great Britain is now at Peace with all the World: Long may he live to enjoy it, is my hearty Prayer; and then we need not doubt of much Tranquility and Happiness, notwithstanding the vain Fears that we too frequently perplex our Spirits withal. Could we be content and quiet within our selves, we should be of all Nations the most happy; and now I have great hopes we are moderately free from the Danger of New Plots and Designs.

By HENRY COLEY.

signs wherewith we have been some years strangely disturbed and affrightned. If Sickness or Mortality approach, let not that molest us; but rather let us submit to the Divine Hand of Providence — Cardan, a great Philosopher and Astrologer, and a very famous man in his time, writ long since, that about the year 1680. *Incipiet mutatio Legum cui nunquam fuit similis, & consurget una nova Lex, & cum his alia multa, &c.* There will begin an Alteration of Laws, the like whereof never was; and there will arise a new Law, and with these many other Changes; and this he saith he extracted out of the Secret Books of Eternity: We have 'tis true had strange Disturbances amongst us since the year 1678. but nothing of Changes either of our Government or Laws, which I pray God may long continue — Yet 'tis to be feared that some dreadful Judgment is approaching, at least impending over our Heads; therefore we ought to endeavour a General Repentance to appease Divine Judgment: For hitherto *Great Conjunctions* and dreadful *comets* rarely pass over without leaving some Notable Impression of their Effects in some Kingdoms and Countreys of the Earth. *Holland* has lately been too sensible of the Comets Effects by their innumerable Loss by Inundation, both of Wealth, as well as of many Hundreds, nay, Thousands of their Inhabitants that perished thereby, which was punctually predicted by me in *Mr. Lillie's Anglicus* 1681. as those that please may read at large. And for each Months Contingencies consult the monthly Observations hereof.

And thus I shall conclude my Judgment of this Quarter, with the Words of a Great Philosopher, which are very significant to our present purpose, &c. What can be more worthy of Admiration than the *Sun* and the *Stars* in their Courses and Glory? And yet so long as Nature goes on in her Ordinary Way, there is very little Notice taken of them; but when any thing falls out beyond Expectation and Custom, what a Gazing, Pointing, and Questioning is there about it? — Every Meteor sets People upon the Query to know the Meaning of it, and what it portends also; whether it be a *Star* or a *Prodigy*?

There

Astrological Observations on the Year 1683.

There are many things which, we know to be, and yet we know nothing at all of what they are. Is it not the mind that moves us and restrains us? But what that *Ruling Power* is, we do no more understand than where it is: One will have it to be a Spirit, another will have it to be a *Divine Power*: some only a *Subtil Air*, others an *Incorporeal Being*, and some again will have it to be *Blood and Heat*. I hope this *Digression* will not be thought unnecessary or impertinent, but rather correspondent and suitable to my present *Subject*; and thus I proceed to consider the *General Affairs and Contingencies of the World*.

(3.) Of the *Summer Quarter* which this Year begins *June* the 11. 17 min. past 11. in the morning, at which time the Sun touches the first *Scripture* of the *Tropical Sign Cancer*, about 21 deg. of *Gemini* mediates *Heaven*, and 23 deg. of *Virgo* ascends in our *Meridian*, and the *Moon* defluxes from the *Quadrant* of *Saturn* and *Jupiter*, and applies to the *Conjunction* of *Venus*, and *Sextile* of *Mercury*, I shall not make any farther *Repetition* of the *Position* of the *Heavens*, at the *Lunation* preceding or subsequent (as in the *Spring Quarter*) but from a due *Consideration* thereof I shall present this following *Judgment*: 'Tis much to be feared, that this *Summer Quarter* may prove a very sickly Season, not only in *London*, but in many places in the *West* and *South West* parts of *England*; amongst the rest, I pray God preserve (my *Native place*) the *Famous University* and *City of Oxford* (wherein I drew my first *Breath*) for the *Comet* which we did first appear in its *Ascendant*, if *Capricorn* be the *Sign* thereof as I find it upon *Record*, then *Saturn* is the *Ruling Planet* in particular, and *Mars* Co-partner. Now the *Quadrat* of *Saturn* and *Mars* from *Scorpio* and *Leo* in *August*, may unhappily afflict the *Inhabitants* thereof in one respect or other— But I hope better things— Very deliberate *Councils* and *Consultations* are now on foot to good purpose, and certainly we are at this time in a moderate good posture— Many *Breaches* lately healed, and are fairly composed amongst us, so that we can by experience declare that there is still *Balm in Gilead*— And we have great reason to be thankful for our *Peace* and *Tranquillity* which we yet enjoy: As for other *Kingdoms* and *Countries* they do not much concern us, but we may certainly expect to hear of notable *Breaches* in some part of *Europe*, especially *Italy* and some other *Countries* adjacent: For those parts seem

By HENRY COLEY.

seem to be severely menaced about this time, by such *Configurations* as we have this *Quarter*, considering also those of great Remark which have already preceded, and lie as it were like Seed in the Ground (not yet appearing to purpose) I say such *Celestial Congresses* of the *Superior Bodies* (together with the other *Phænomena* in the *Heavens*) very rarely pass over without manifest Disturbance and other dismal *Calamities*, besides the great Fears thereof in those *Kingdoms* or *Countries* where *Providence* hath design'd them to powre down their Effects--We may justly fear some dangerous Sickness) God preserve us from another *Plague*) which will prove very fatal to Mortals, more than strong Tumults, or Disturbance; by Mutinies amongst some dissatisfied persons, who will thereby ruine themselves whenever they attempt any such Combustion— Many Persons of the *Romish Perswasion* will be *Passive*, and suffer much in their *Estates* and *Fortunes*. Some *Religious Houses* far remote beyond Sea, will receive great Detriment, it not demolished, or casually destroyed— The Doctrine and Discipline of the *Church of England* is such as was established by *General Councils* and *Synods*, and afterwards confirmed by the *Laws of State*. *Unity and Uniformity*, *Necessity* and *Order*, *Strength* and *Beauty* are the *Ingredients* of our *Protestant Religion*, and who can but love such a *wholesome Composition*. God bless us from such a *Reformation* that must be advanced by the Ruines of a well settled Government and Constitution— But to my present Subject, the *Configurations* of the *Planets* this *Quarter* are very significant, and they will certainly have notable Effects; those that please may take a View of all the *Aspects* of the *Planets* (except the *Moon*) in one Page at the beginning of this last Sheet, wherein they will find throughout the whole year not less than 88. and many, (or most) of them of very eminent Signification, whence these Judgments are (for the most part) deduced— The *Spirits* of men this *Quarter* should be much inclined to *Wrangling* and *Contention*, and therefore some unlucky *Accident* or *Accidents* are now the rather to be feared. God grant no more *Barbarous Murthers*, such as that worthy Gentleman's *Thomas Thynne Esq*, was— I fear towards the latter end of this *Quarter* Losses and Damages may befall the *Industrious Merchants*, and that men will prosecute their Malice one towards another with great *Animosity* and *Fury*— Some professing Religion, or much *Tenderness* of Conscience

Astrological Observations for the Year 1683.

imprisoned and disturbed, and the Common People too subject to complain, some of lean Crops, and a scarcity of many Commodities of great use to Mankind. In Fine, many horrible Acts committed in several Countries of *Europe*, and sometimes we may now expect (as of late years) various and prodigious Sights in the Air: Much Prejudice in the Fishing Trade: Many Shipwracks at Sea, and in all probability, News arrives of Disturbance, if not War like to be between some Princes and their Allies, and such exorbitant Actions seems to be much threatned, or at least much feared and spoken of this Quarter — Many are too subject also to give themselves up to Temporal Vices, *contra legem*; but such persons rarely escape unpunished: For he that will go to Sea must look for some Storms and cloudy Days — But I shall conclude the Judgment of this Quarter in the words of *Horace*, viz.

*What e'er is bidden, Time will bring to light,
And that will vanish which now shines so bright.*

(4.) Of the *Autumnal* or *Harvest Quarter*, which begins this Year September 13. about 7 in the morning, at which time 11 degrees of *Libra* ascends, and 14 deg. of *Cancer* culminates; the Moon separates from a *Sextile* of *Saturn*, and applies to a *Sextile* of *Jupiter*. *Mercury* is in *Sextile* to *Mars*, and *Mars* in *Square* to *Jupiter*, as may be seen by the *Synopsis* of the Planets Aspects, whence this Judgment arises (Consideration had to other Concomitant Configurations of the Planets this Quarter.) The Actions of this Quarter begin with very fair pretences, and the people are now in Expectation of very hopeful Proceedings for the general Advantage of the whole Nation; and here seems little or no Contradiction during this Quarter in the Great Affairs of the Publick; but very Mature Councils are continued to the general Satisfaction of the Loyal Party, and all true-bred English-men; but in the midst of our greatest Hopes, we shall be sure to expect the discontented Tongues, or Pens of some Hot-brain'd Persons, that delight to bring themselves into Trouble, whereas otherwise they might live at Peace — Let such Persons know, that the Evil which they think to drive away by an indiscreet Revenge, will return upon them with Usury — For generally it so happens amongst us, that after a Shower of Wrath has been poured out, immediately follows a Flood of Grief: It is therefore the sweetest Revenge (if possible) to forget an Injury, whether real or supposed —

— But most men, when they attempt one *Vica* to *Shun*,
 Into the contrary do madly run —

In short, we may rationally expect the Actions of this Quarter to be of great Concernment in Civil Affairs— And now generally all deserving Men are encouraged; many have Honour conferr'd upon them— and not only so, but very Noble and Generous Rewards from their Rulers or Governours. And this is not all; but our Merchants have now good hopes of very considerable Returns, not only from the *Eastern*, but *Western* parts of the World ——— To conclude, the Diseases of this Quarter, and generally throughout the whole Year, should be very many, and those of dangerous Consequence, and very destructive to Mankind. God preserve us from a sweeping Pestilence, and from any thing that looks like Scarcity in this our flourishing Island. Much unseasonable Weather I fear may happen, as in the Year 1682. and if so, it will certainly advance the Price of Commodities, and consequently produce a general Complaint among the Middle, (as well as Meaner, or more Inferiour) sort of People. And thus I conclude my Judgment upon the Four Quarters of the Year, and have considered all things that are necessary to be observed in this way of Predictions, that is to say the *Latitudes*, *Mutual Aspects*, *Eclipses*, (that which will be visible especially this Year, I mean of the *Sun*,) in which Judgment I have not forgotten the late *Comets* and admirable *Conjunction* of *Saturn* and *Jupiter* in *Leo*, which will shew its Effects this next seven years to purpose (who ever lives to see it) and their Influence will more or less continue in force till their next Meeting in the year 1702. But ———

— Philosophy renders some men so bold,
 They're not affrighted when they do behold
 The Sun and Stars so variously appear,
 In all the different Seasons of the Year.

(5.) Of the *Eclipses* of this Year, and they are only three of the *Sun* (visible, if the Air be clear) and two of the *Moon* to us invisible. The First of the *Sun* happens on *January* the 11th a little past 3 in the Afternoon, in the first Decad of *Aquarius* (my Ascendant) Digits Eclipsed about 10. This Eclipse will aggravate the Effects of those many Configurations in *January* which will shew or manifest themselves very apparently in the succeeding Months, whereof nothing need be said more than

what is already done. The Second *Eclipse* is of the *Moon* Fe-
bruary the first about 3 in the Afternoon. And the Third of the
Moon July the 28. at 8 *manè*, both invisible in our *Hemisphere*;
and therefore nothing more need be said of them in this place.

There will be another *Eclipse* of the Sun, though invisible to
us, not mentioned by *Argol*, July the 14th. about 2 in the Morn-
ing in 2 degrees of *Leo*.

A D V E R T I S E M E N T.

THese highly approved and true Spirits of *Scurvy*
Grass both plain and Golden, famous for the
Cures in the Scurvy, Droplic, and several other gene-
ral Distempers, are exactly and faithfully prepared,
and sold by the first Author *Robert Bateman*, at his
House in *Pauls Chain*, near *Doctors Commons* London,
with Printed Directions for their Use: The Bottles
are Sealed with his Coat of Arms, the *Half Moon*
and *Ermins* to prevent Counterfeits, Price 1 s. each
Bottle: These are the true Spirits, notwithstanding
all Pretenders thereunto, therefore let all Persons be-
ware they be not cheated by others that pretend to
make and sell the same.

All sorts of Chymical Preparations are faithfully pre-
pared without the least Sophistication, or Adulterati-
on, and to be sold at Reasonable Rates, by *Christo-
pher Pack* Chymist, at the *Globe and Furnace*, in the Po-
rt near *Mitre-gate*, where a Catalogue may be had gratis.

Agues of all sorts, Worms in Young or Old, Stone
and Gravel in the Kidneys (though given over as in-
curable) are safely and certainly cured (under God)
by *D. Woodward* at his House in *Horshee Court* in *St.*
Clements Lane, without *Temple Bar*.

At the Sign of the *Golden Griffin* in *Bell-Savage*
Yard, on *Ludgate Hill*, liveth *William Boys*, the only
English Operator in *Glass*, and the most expert in
making Artificial Eyes.

BUCK-

BUCKWORTH'S LOZENGES, famous for the Cure of Coughs, Colds, Catarrhs, Hoarseness, &c. being also a great **CORDIAL**, and a Sovereign *Preservative* against all Contagious Distempers, malignant Air, and unwholesome Weather, well approved of by the Chief Physitians of the Colledge, to whom the true Receipt hath been communicated by the Publisher hereof; are now more faithfully prepared than since the Author's Decease; and are Licens'd for Publick Use and Benefit, by Sir *John Micklethwaite* Deceased, President of the said Colledge, London, being rightly prepared only by *James Shipton* Apothecary at the *Crown* in *Hatton Garden*.

1. *Synopsis Medicinæ*, A Compendium of Physick, Chirurgery and Anatomy, in 4 Books, shewing the Signs, Causes, Judgements and various ways of curing all Diseases, whether external or internal, the 2d. Edition, enlarged with 200 several Additions, and adorn'd with 24 Copper Plates, with the compleatest Anatomical Idea of the whole Humane Frame.

2. *Iatrica seu Praxis Medendi*, the practice of Curing, or Medicinal History. Together with the choicest Observations of other famous Men: All digested under their proper heads; the Work being published weekly.

3. *Hora Mathematica*, The Soul of Astrology: With *Placeta Genethliaca*, or the new way of managing Nativities, and finding out their several Directions, by Inspection only, without trouble of Calculation, being most consonant to Nature, Reason and Truth. A Work wholly new.

4. *Pharmacopœia Londinensis*, The New London Dispensatory, 6 Books. The 2d. Edition, with a Table of Diseases.
